

CONWAY TRAILER TENTS

BELIEVE IT OR NOT WE

The superb luxury features of Conway Trailer Tents and the easy, reliable system for speedy erection make Conway Camping the best you will find.

The Conway range offers the ultimate in trailer tenting with spacious models for all sizes of family and at prices for all sizes of pocket.

Each model has the unmistakeable quality of design and performance which has made Conway the most respected name in trailer tenting today. And you don't have to worry about after-sales service and spares - Conway is a British company with a specially selected dealer network to ensure your complete satisfaction and speedy assistance - we call it 'Conway Care'.

Sleep in comfort, not on the ground

At Conway, we consider one of the most important factors in the enjoyment of your camping holiday is a good night's rest, and with all the fresh air and healthy living - you'll need it! You spend 50 weeks a year lying on a soft mattress - why expose yourself suddenly to the bare hard ground?

Conway have taken a great deal of care to ensure you get a good night's rest. Standard features on all our

models include two spacious double sized sleeping areas, well clear of the ground, each fitted with a luxury double foam mattress.

And the two fully enclosed inner tents keep out unwanted visitors.

Rest assured - rest Conway.

Outdoor cooking par excellence

The superb, specially designed Conway Cooker is presented in a fully fitted kitchen unit with all the amenities you need to really enjoy outdoor cooking. Double burners and grill - with an efficient low pressure safety system - stainless steel sink unit and drainer, work surfaces and ample storage space.

And what an added advantage to be able to prepare a roadside snack without unpacking the trailer!

Drive safely, travel cheaply

All Conway Trailers are light, compact and will stay within the width of your car, allowing see through vision whilst catching very little wind.

This means safer driving, and you will use little more petrol than driving solo.

Space to spare for all home comforts In the car...

Room, at last, to travel in comfort - no more desperate attempts to cram everything in the

leaving a roomy space for all your camping gear.

(Not only is it kinder to the family – it's kinder to the car.)

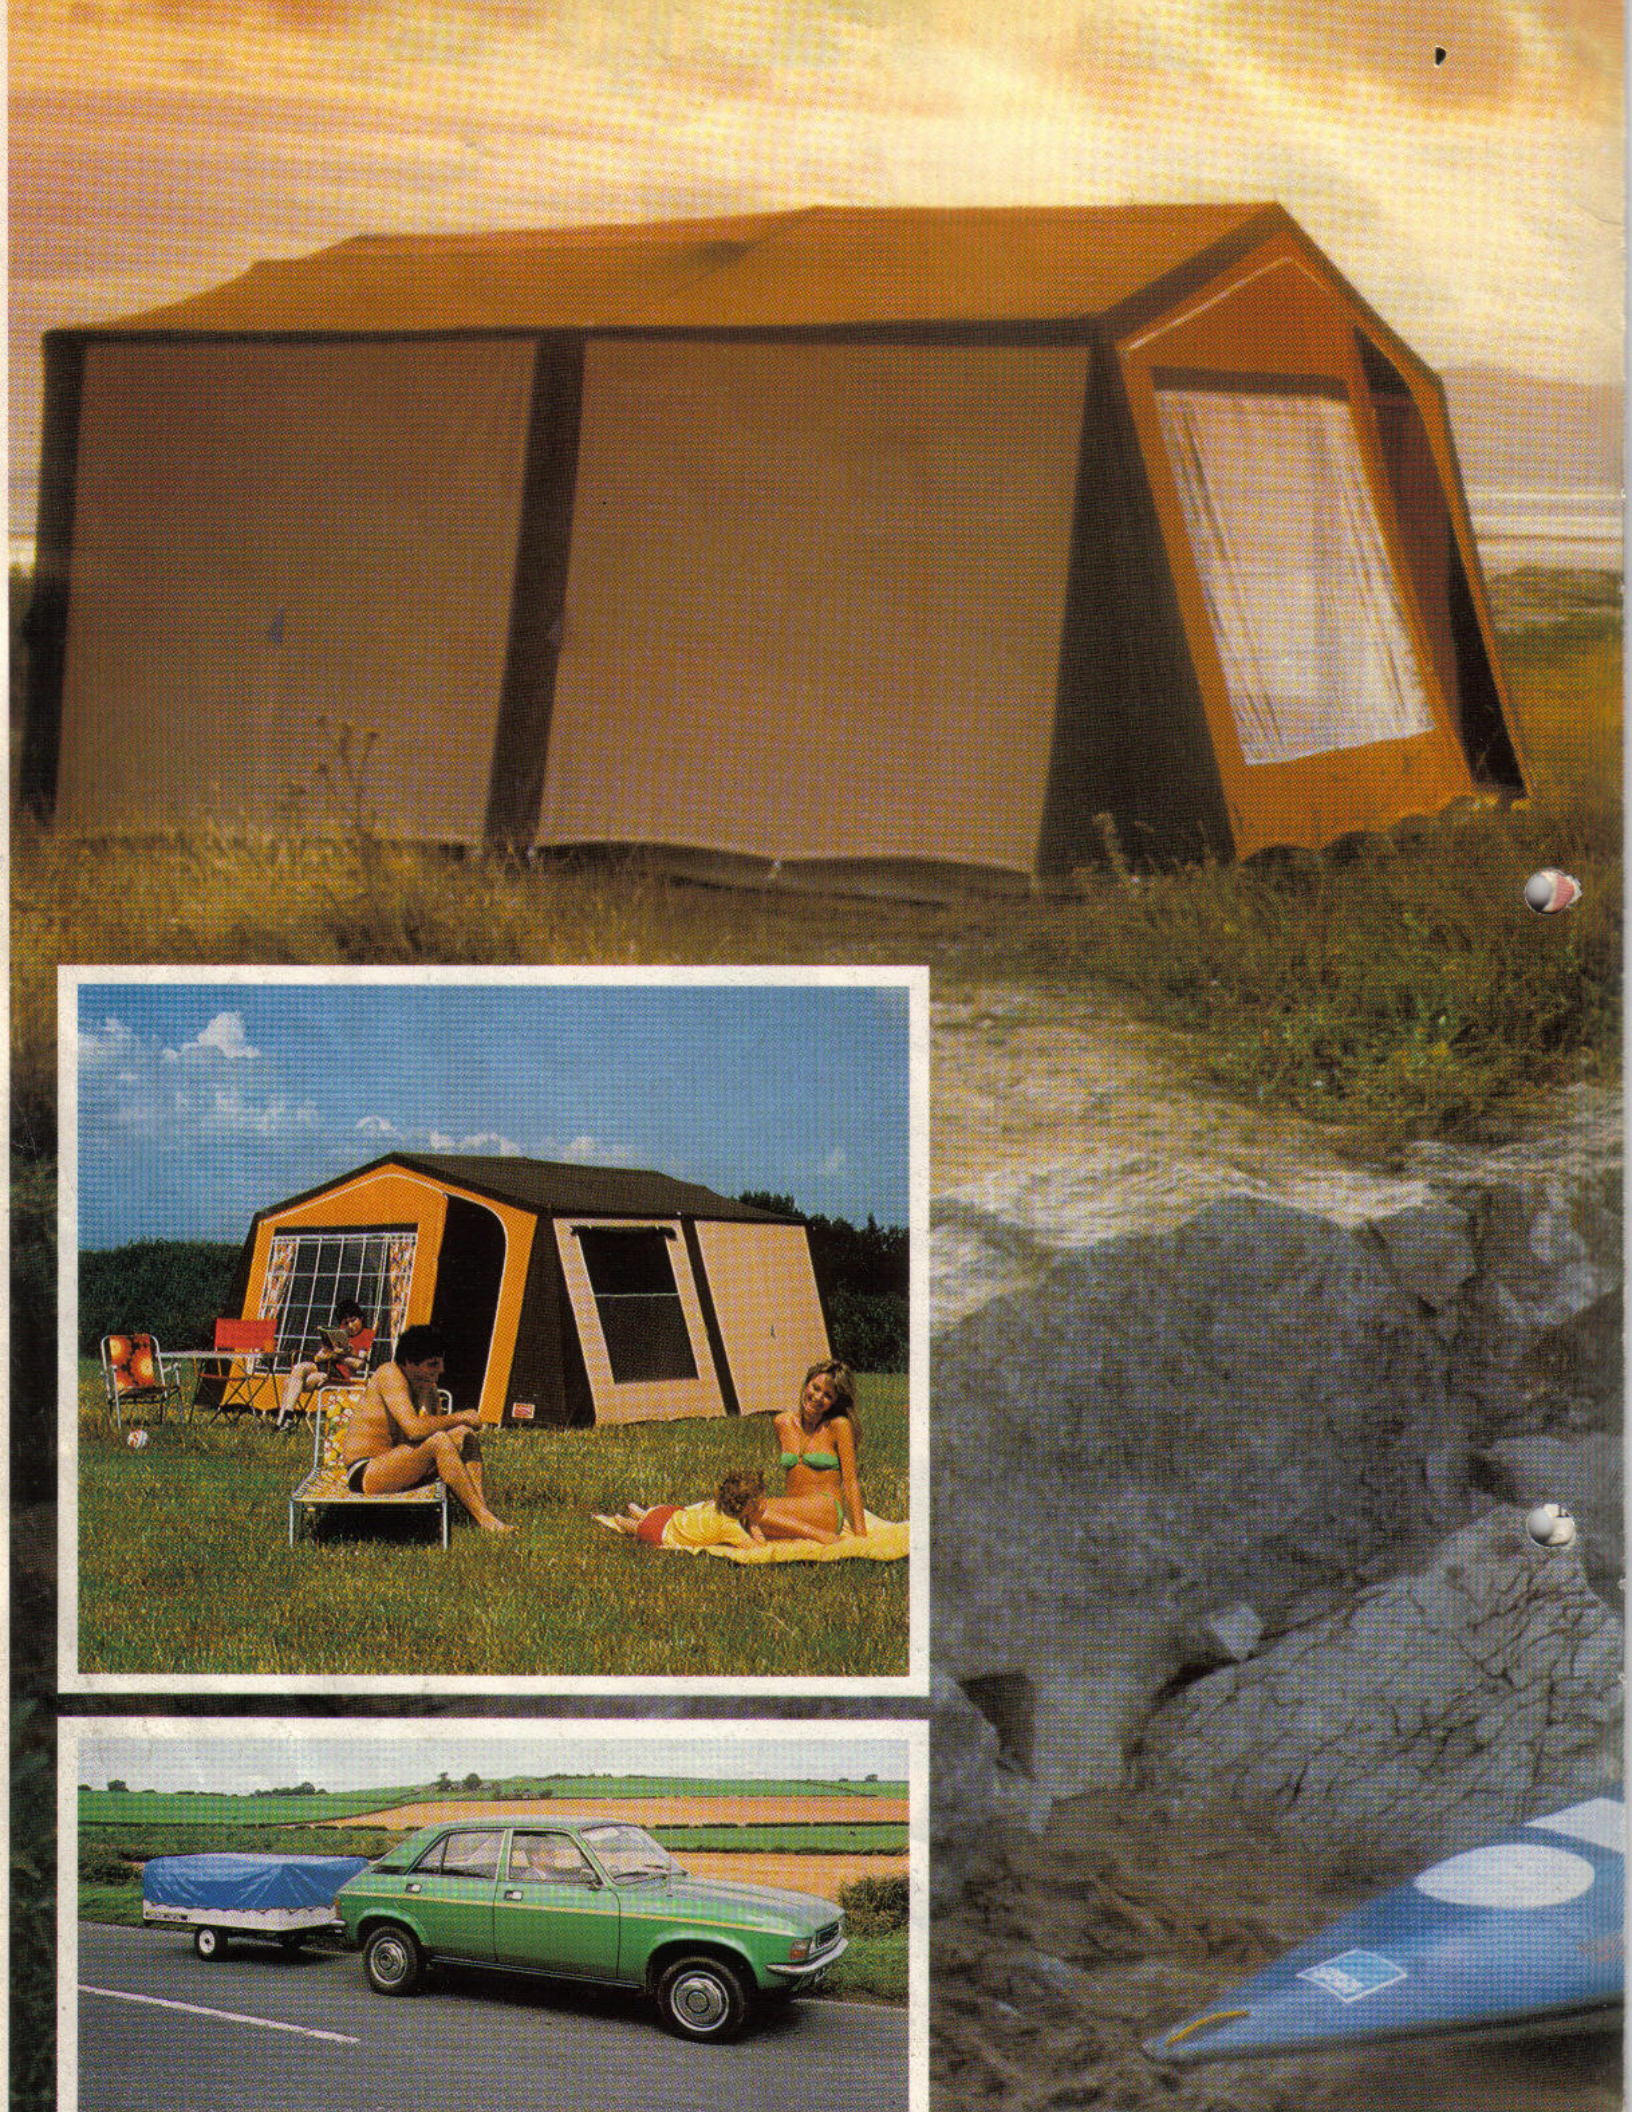

On the site . . .

The clever design of the Conway Trailer also overcomes the problems of on-site storage within the tent area and so protected from the elements. You can store large items such as tables and chairs completely away from the living and sleeping areas. (Even the strong trailer cover doubles as additional protection for cumbersome suitcases and bags.)

And at home . . .

The special wheeled storage bracket is available for easy side-on manoeuvring down narrow passages and convenient storage along the side of the car in the garage.

Conway Colt

Colt offers all the traditional Conway quality and engineering at a budget price. It offers accommodation for 4 plus, and features the luxury foam mattresses, inner tents and extension roof lining that are common to all the Conway range.

A 4 x 2 metres integral extension gives adequate living area for the family, and 24 cu. ft. of storage space allows the camper to pack all his equipment into the well of the trailer.

Conway place great emphasis on the canvas, which is of the usual superior quality - after all, it is the only guard between you and the elements.

The Colt's folding system is of the same unique design as the rest of the range, enabling you to pack up with wet canvas without wetting bedding and camping equipment.

A sun canopy is available as an optional extra.

See Conway accessories list for other optional extras.

Ex-works weight	200 kg
Max gross weight	356 kg

ERECTED

Conway Campa and Campa

De Luxe

Conway Campa is a name that has been used by Conway since 1973 and has come to be closely associated with Conway quality and craftsmanship.

The 1980 'Campa' is however an exciting new trailer tent with many features in addition to the standard, double mattresses, inner tent, and roof lining.

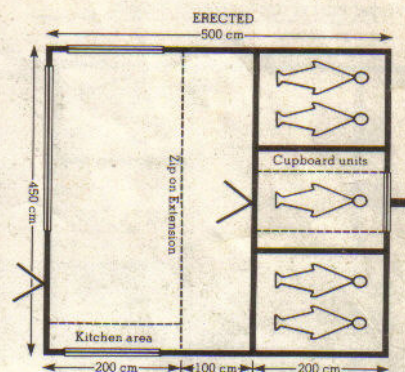

As overnight stops are becoming more and more popular with today's camper, this model is designed to enable the sleeping section only to be erected in a mere 4-5 minutes. For longer stops the 1 metre canopy and 2 metre zip on extension can then be added giving a vast 4 x 3 metre lounge area with room for all the family.

Using the same canvas as the Campa, the Campa de Luxe has a more luxurious trailer and the added feature of the Conway kitchen unit. The inclusion in the trailer of locker units and table enable this area to be used for eating or relaxing in the evening.

The kitchen unit is available in 2 styles: as a standard unit which allows the customer to choose his own stove and sink, or for a small extra cost the luxurious Corniche kitchen is available including double burner and grill, stainless steel sink and drawer unit.

Tent:		
Canvas	Roof	310 gms
	Walls	220 gms
Trailer Spec. as Corniche		
Ex-works weight		300 kg
Max gross weight		400 kg

Conway trailer tent in the U.K. last year, but at Conway we are always trying to improve. Our improvement to this model for 1981 is the addition of a zip on 4.5 x 2.5 metres extension, allowing this unit to be used for overnight stops with the minimum of effort. And on site it gives the ultimate touch of luxury.

The Corniche represents the last word in comfort, with its extravagant dimensions and abundance of superb features, most available accessories being fitted as standard. Like an integral table, roomy storage cupboards, roof lining, kitchen divide, unobtrusive kitchen and wardrobe units and a sun canopy.

All interior fittings - inner tents, roof linings and curtains - lend valuable light and colour to the interior, whilst the exterior is an ecological blend of beige and russet fabrics.

Steel framed castored storage brackets, enable you to manoeuvre the trailer through narrow side passages, etc.

of our trailer tents.

A trailer tent has no door which can just be opened with a key to allow you to walk in. It has to be erected, and no matter how easy we make the erecting, there has to be a procedure. If this procedure is not carried out correctly you could be in trouble. Our handbook will make things more easy and pleasant to every customer it contains.

1. Erection instructions supported by line drawings bringing out the main sequence of events.

2. General hints for Camping. Camping is an ideal way of spending one's free time at a reasonable cost. However, if the camper is not prepared for the worst, the results could be a disaster, especially where strong winds and rain are concerned. In this section of the booklet we try to prepare you for the worst.

3. Care and Protection of your canvas. Our canvas is made from 100% cotton, not bricks and mortar, therefore care is needed to allow you to get the maximum life from it. This section offers a few hints on care and storage.

4. Maintenance Details. There is not a great deal of mechanical maintenance required, but what is explained in detail allows the customer to carry this out himself and therefore save garage costs.

5. The Guarantee. This is to give the customer confidence in the product he is buying, knowing that any faulty article will be repaired or replaced, within reason.

6. General Assembly and Parts Drawing. This shows in detail the full assembly of the trailer, making it easier for the customer to understand the technicalities.

People use different terminology when referring to parts, therefore liaison becomes difficult. This part's list enables everyone to name the article required by the correct number and title. The customer, dealer and ourselves will therefore, understand what is required.

People will say we are biased but we state that we manufacture a strong, well designed trailer with a good quality canvas and sound after sales service.

While the information contained in this brochure is correct at the time of going to press, it may be that on account of the use of alternative materials or the shortage of supplies, alterations may have to be made to the trailers described in the brochure. Particulars of any changes may be obtained from the manufacturer.
