TransCamper

Range of motorcycle trailer tents,
touring trailers and dog trailers

CampMaster TourMaster DogMaster

Before construction Trailer body size 1.0 x 1.4m

After construction Erected size 3.0 x 6.3m (CampMaster 4)

The CampMaster

The latest edition to the TransCamper range of trailer tents, which have been providing great holiday experiences since the early 1980's. The TransCamper brand has a solid reputation for quality, style and reliability. If your looking for the most compact trailer tent money can buy, look no further than the TransCamper CampMaster. These unique trailer tents were originally designed for bikers who wanted more comfort whilst camping and touring the open road, but are proving just as popular behind motor vehicles who want a small, compact and lightweight trailer tent.

CampMaster 2 and 4
Comfortable double bed

CampMaster 4
Optional awning inner tent (sleeps 2)

CampMaster 2 Erected size 3.0 x 5.3m plus sun canopy

Combined Trailer Tent and Touring Trailer

The CampMaster can be towed by any motor vehicle and solo motorcycles (restrictions and law apply). The innovative opening system has the polework, canvas and bed attached to and hinged inside the trailer for ease of assembly. With a little practise it is possible to erect a CampMaster in under 20 minutes, including pegging out. These lightweight and compact trailer tents are ideal for touring but also big enough and comfortable enough for long holidays on one sight.

Models

Two versions of the CampMaster are available: the CampMaster 2 and the CampMaster 4. They both utilise the same trailer but the Campmaster 4 provides an additional space of 1.2 x 3m (approx). An optional two birth inner tent is available for this space, so the Campmaster 4 can sleep up to four adults.

Quality/Standard Features

- Worlds best tent cloth (100% Tencate 280 GRM)
- Reinforced high quality glass fibre polyester body
- Galvanised chassis
- Chromed luggage rack
- Swivel or fixed 50mm tow hitch
- Chunky wheels and tyres
- Lockable lid for security
- Parking leg

Finish

Black or white is the standard colour, with many clients customising and gel coating to match their vehicle. The standard finish is of high quality and very hard wearing. All the trailers are hand made therefore slight marks may be evident due to manufacture and transport. Gel coating enhances the look and provides a hard wearing finish.

Hard to Believe

The folding system including polework, canvas and bed are all housed in the lid with room to spare. It is hard to believe but the bottom half of the trailer is empty which gives 500 litres of storage space for clothing, sleeping bags, cooker, fridge/coolers, table, chairs, lighting, gas bottles etc. The folding system and bed can be taken out (by removing four bolts) leaving an even bigger touring trailer.

TourMaster 600 Shown with extended drawbar and storage box

The TourMaster and DogMaster

A complete range of touring and dog trailers suitable for motor vehicles and solo motorcyclists. Just the ticket for camping, holidaying, shopping and work use. Both the TourMaster and the DogMaster can be supplied in black or white (see Finish section) made from reinforced glass fibre polyester. Fixed or swivel hinge comes as standard (50mm).
