Step-by-Step Instruction Leaflet

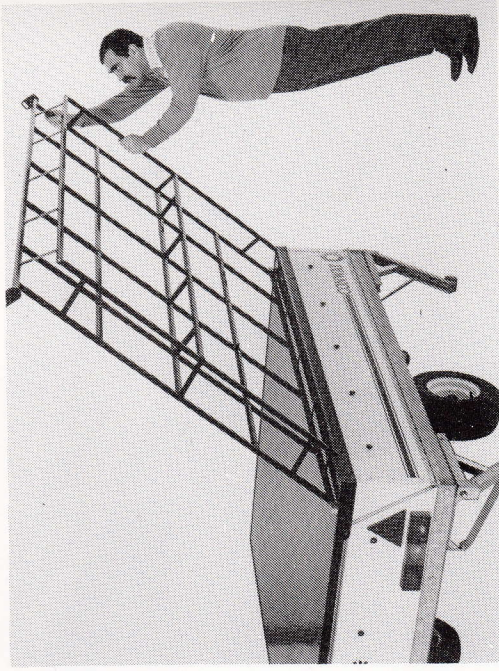

GAZELLE Trailer Tent

Please use these simple and easy-to-follow instructions to set up your Gazelle Trailer Tent

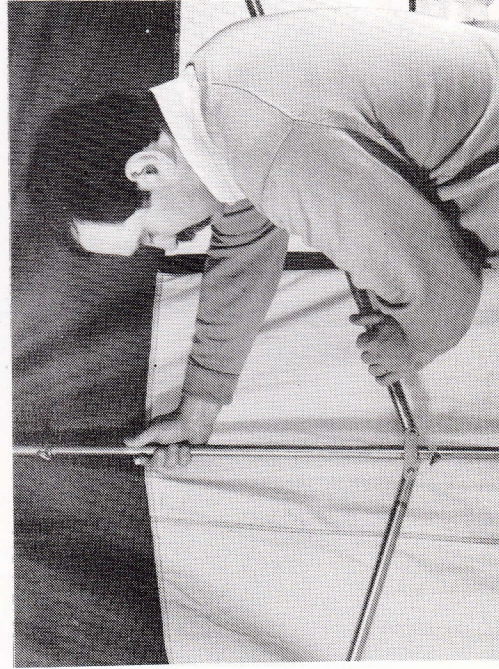

1

Remove trailer from car and level using jockey wheel.

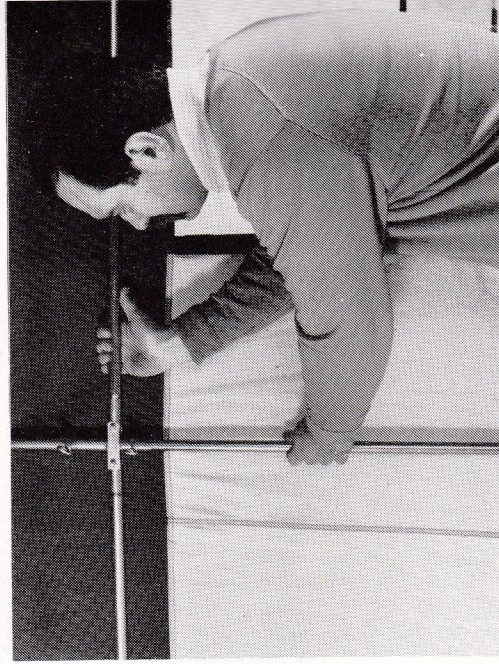

2

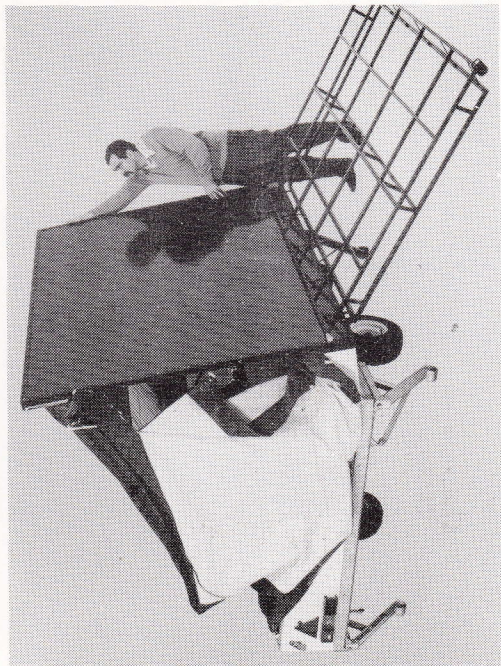

Release catches on luggage rack and lift over until the edge of the rack rests on the trailer lid.

5

Step inside the trailer and release the wing nuts on the sliding arms at the base of the centre uprights. Push the sliding collar up the upright until it stops against the upper sliding section and the side frames are horizontal. With 2 people the sliding collar can be pushed up simultaneously at front and back. If 1 person is erecting the unit we would suggest that each collar is moved a little at a time to prevent the frame twisting. Release both wing nuts and now push up both the collar and the upper frame sections at front and back until the canvas is taut.

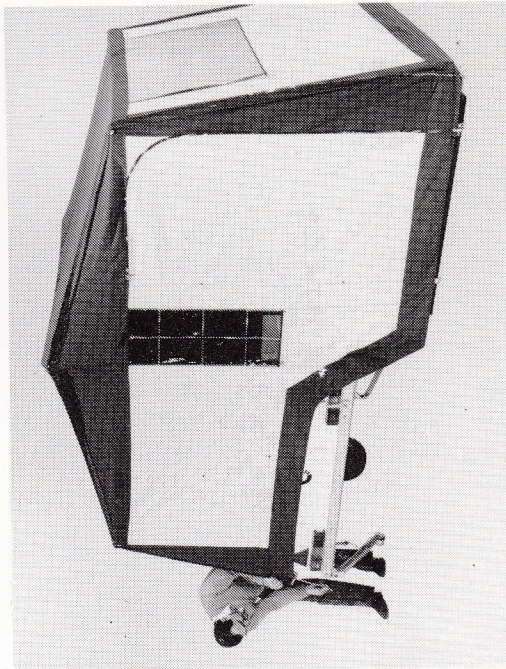

3 Pull over lid and attached canvas, the luggage rack will automatically fall to the ground to form a base for the lid.

4 Wind down the four corner steadies to ensure the trailer is stable and level. On soft ground use the 4 plywood pads provided. If ground is uneven we would suggest that the rack is supported by wooden chocks.

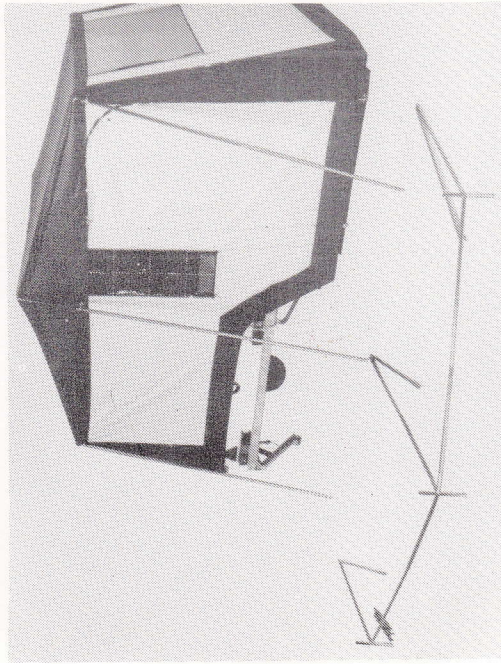

6 Fit the 4 adjustable torsion bars in each corner of the trailer tent.

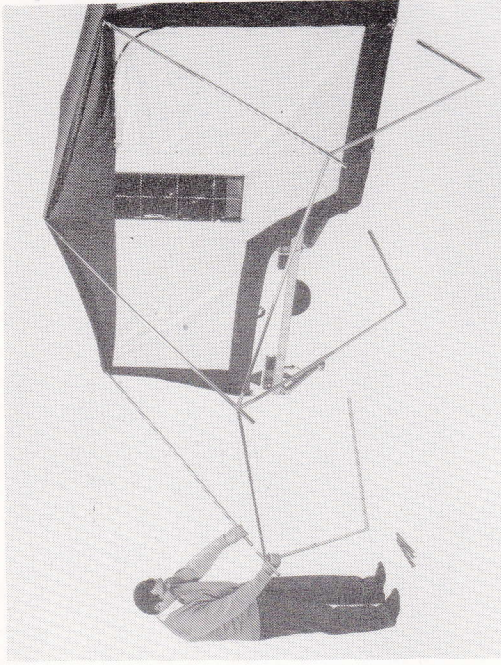

7 Step outside the trailer, close the zipped door and fit the canvas around the trailer by fastening the elasticated clips to the edge of the chassis members or cross bars of the roof rack. Peg out the 3 points at the door.

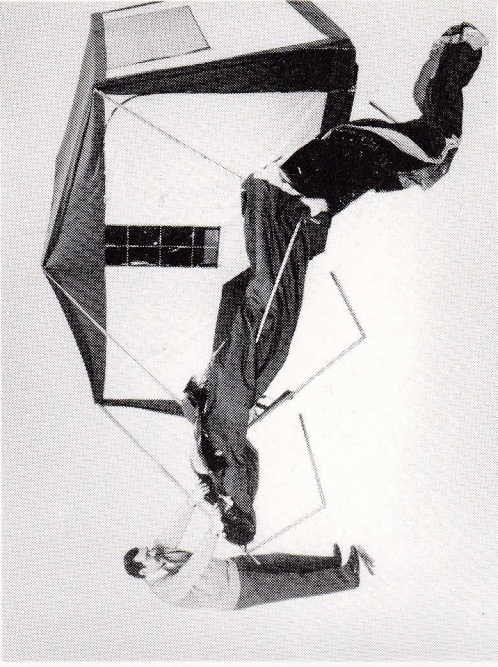

GAZELLE Extension

1 Remove extension frame from bag, connect spring-linked front sections and lay out on floor, as shown. Connect centre leg and assemble 3 roof poles and hook into main cabin frame through gusset in canvas.

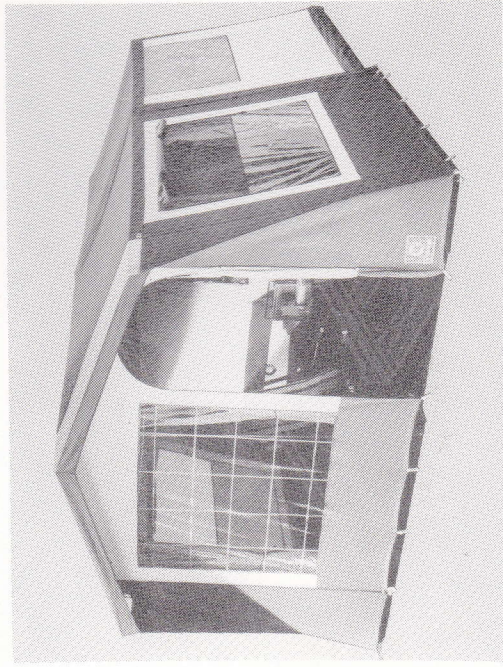

2 Connect 3 roof poles to front extension frame leaving bottom section of leg 'broken'. This leaves an easy working height.

3 Remove canvas from bag and unroll along front of frame, as shown.

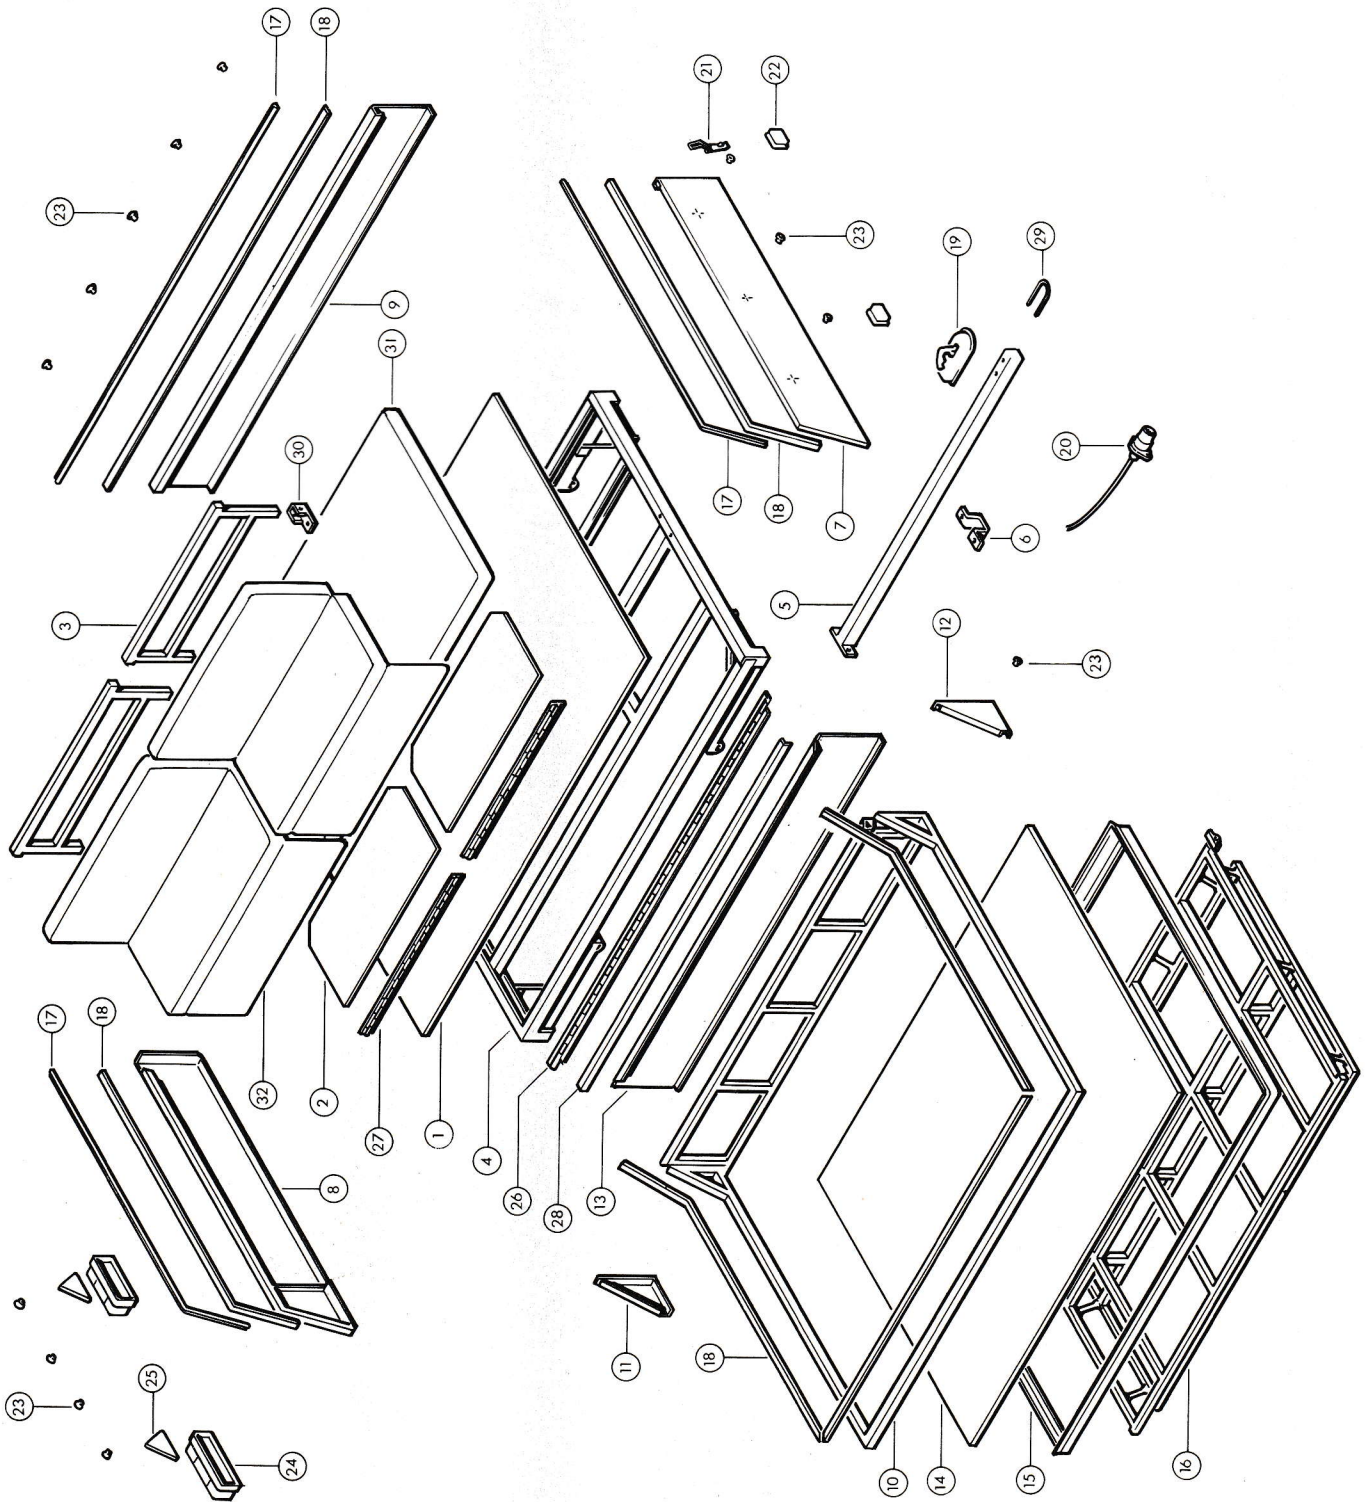

4 Pull forward front of extension and fit 3 short canopy poles through the gussets in the canvas. Then fit canopy to poles.

5 Lift the extension frame to its full height. Zip to main cabin canvas and tension as necessary. Peg out with all zips closed.

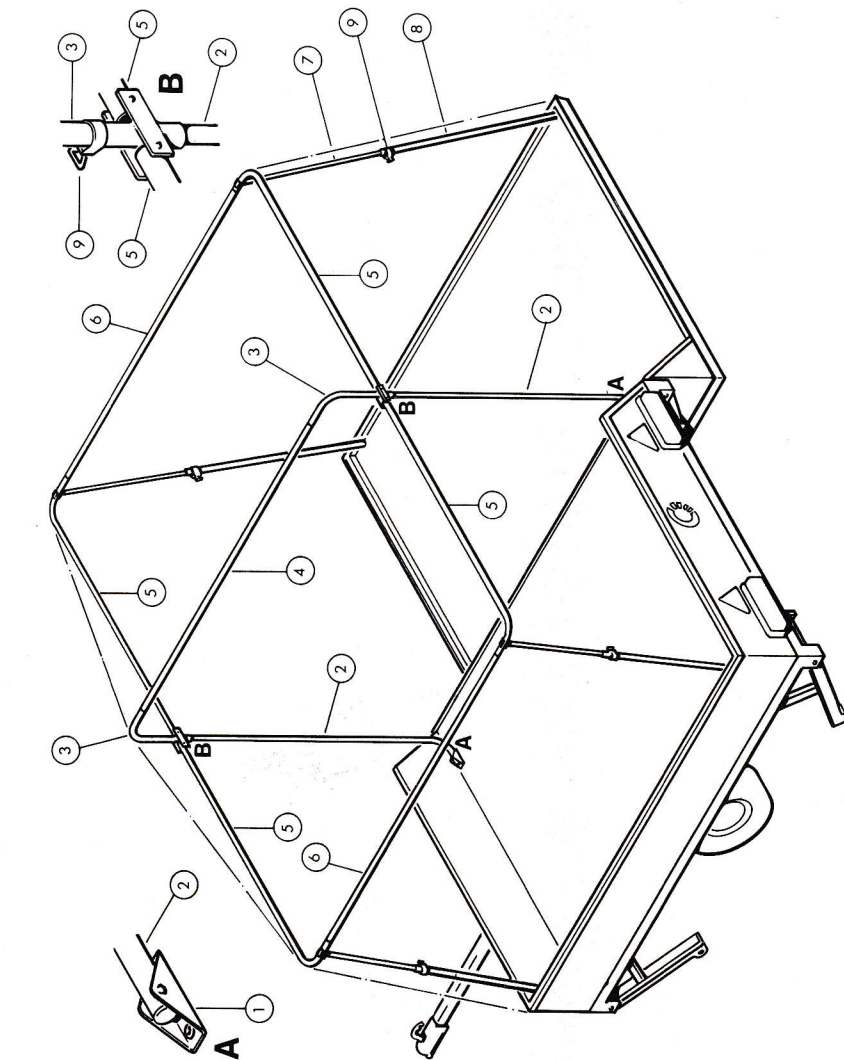

GAZELLE Body

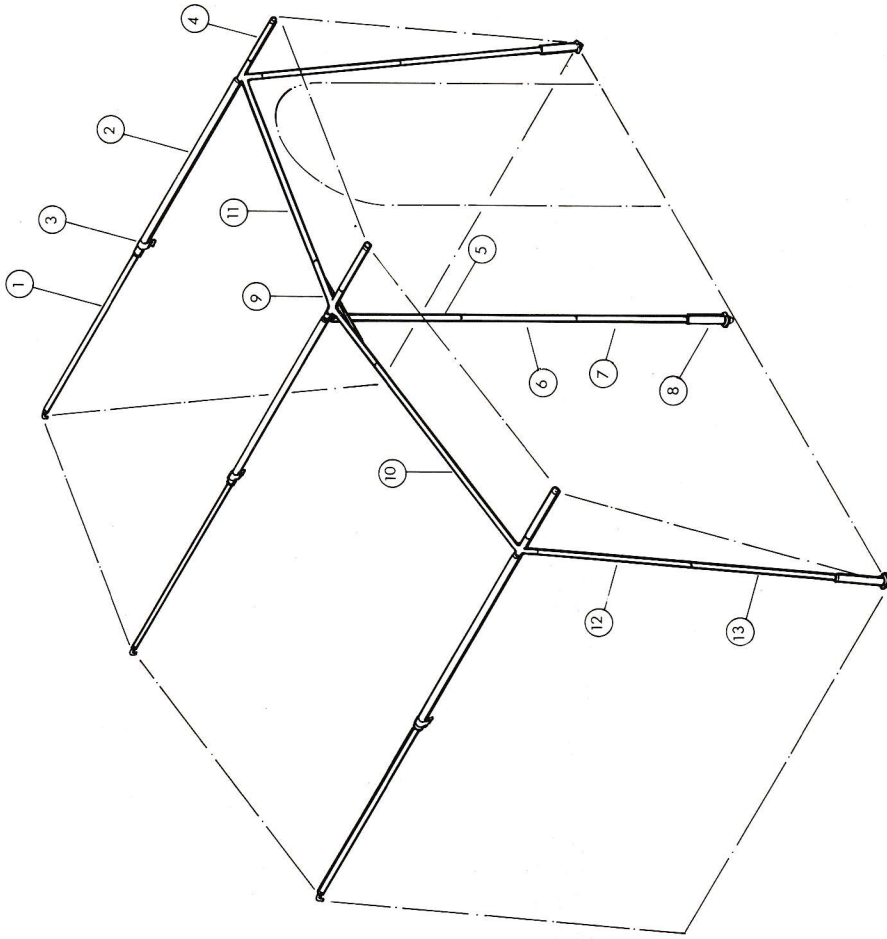

Ref. No.	Part No.	Qty.	Description
1	84138	1	Base Board
2	84139	2	Seat Boards
3	84140	2	Bed Legs
