

EXCEL ERECTING INSTRUCTIONS

The following instructions are intended as a step-by-step guide to help you erect your Conway unit. Please read your Owners Manual thoroughly where you will find other helpful information within the section on pitching.

Main Cabin	1-11
Kitchen Instructions	12-15
Awning Instructions	16-21

1. Apply handbrake and level trailer by means of jockey wheel.

2. Remove transit cover. Open rear doors, remove winding handle and lower the four corner steadies.
NOTE: Corner steadies should not be used as jacks to level the unit. (please see pitching instructions.)

3. Fold out the bed boards and ensure that the legs hinge correctly to the ground.

4. Adjust the heights of the bed legs if necessary to level bed.

5. Release left and right hand centre 'A' frame ports from rubber retaining bands and button clip together at the centre.

6. Pull canvas down from the roof at the front of the trailer. Open the door at the rear of the trailer.

7. Step inside the trailer, push out bed end supports to first button clip and repeat for the central support uprights back and front.

8. Close trailer and canvas doors. Pull canvas over bed ends and hook elasticated canvas sides to cleats under the bed boards. Attach velcro strips on the canvas to the plastic mouldings on the trailer. Adjust the poles (shown in 7) as necessary to tension canvas.

9. Unclip waterproof protective cover from mattress and roll back, unbuckle webbing mattress retaining straps. Fit right hand inner tent and separate roof liner by hooking to roof poles.

10. Fit left hand inner tent ensuring back rest support poles fit through slot in base of inner tent, extend frame and then hinge down flat and fit mattresses for use as a bed.

11. To convert left hand bed to a bench seat, hinge up back-rest support frame and lower top bar to short position. Fit the two support poles in brackets on the bed board and clip to bar. Reverse procedure to fold down.

EXCEL KITCHEN INSTRUCTIONS

12. Open the back doors of the trailer and roll back the canvas door.

13. Swing the door support bar out and click in position. The door will click into the bar and hold firmly.

14. Pick up the compact kitchen and lower onto the door. The rails will locate against the back of the kitchen unit. The kitchen can also be used on top of the storage cupboard.

15. Click the gas pipe to the top of the cupboard making sure it is secure.

EXCEL AWNING INSTRUCTIONS

16. Take awning frame from bag and layout as shown. Assemble 'A' frame and hook in three roof support poles to main cabin.

17. Fit front 'A' frame with legs 'broken' and connect 2 side roof poles to front frame.

18. Take canvas from bag and lay out over roof poles.

19. Pull canvas up roof poles and zip on awning canvas to main canvas, ensure canvas zip cover is pulled over zip.

20. Lift front frame to full height, zip on awning skirt and fit draught skirt.

21. Pull canvas over front, fit stub canopy poles then tension roof poles, peg out canvas, remembering to peg out elasticated zip cover.
